

Innovative Satcom Products

High Performance - Compelling Value

Decimator Spectrum Analyzer Series

SED SATCOM PRODUCTS

GEMINI DVB-S/S2/S2X MODULATOR

- Superior RF performance & flexibility.

SPECTARE SPECTRUM VIEWER

- View L-band signals on a budget.

DEFENDER SPECTRUM PROTECTION

- Protect & occupy unused spectrum.

ITUS L-BAND REDUNDANCY SWITCH

- Intelligent signal analysis-based switching.

DECIMATOR PROVIDES LOCAL OR REMOTE MONITORING AROUND THE WORLD

Decimator remotely monitors communication signals anywhere RF signal monitoring is required; all that's required is a standard internet connection.

With a frequency range of 5 MHz to 3 GHz, the Decimator Spectrum Analyzer provides accurate & fast measurements at a compelling cost.

Decimator is ideal for either local or remote monitoring of RF feeds and carriers in satellite, cable or terrestrial wireless networks.

- Sophisticated, yet easy to use web-based user interface.
- Available in multi-port (4 or 8), portable & PCIe card form factors.
- View up to 100 carriers on a single screen with CarrierWatch software.
- Built-in applications for cross-pol isolation & carrier monitoring with API, SNMP traps & email alarms.
